

# Mission Driven Velocity

Clarity delivers mission-driven velocity — engineering and accelerating secure, resilient software, data, and cyber solutions for the Department of Defense, Intelligence Community, and Federal Agencies. We fuse the agility of digital-native engineering with mission-tested delivery, ensuring technology delivers operational advantage in any environment.

We know the mission because we've lived it. Our teams design solutions with and for the warfighter — built for the fight, resilient in contested environments, and ready to scale across domains.

By working side-by-side with government operators and decision-makers, we co-create capabilities that adapt at the speed of operations. Every solution we deliver is engineered for resilience, security, and usability, empowering Airmen, Guardians, and mission partners to execute with confidence.

## What We Do

- Resilient Cloud, Edge, and Platforms
- AI, ML, and DataOps
- Agile Full Stack Capability Development & DevSecOps
- Mission-Centered Design & User Experience
- Offensive & Defense Cyber Operations
- Cybersecurity Tooling & Automation

## Work With Clarity

### GWACs

- GSA MAS 54151S
- GSA MAS 518210C
- SeaPort NxG

### Consortiums

- USAF Advanced Data Consortium
- ORION Consortium

### DAF & DoD Contracts & Programs

- Mission Delivery as a Service (MDaaS) IDIQ
- Platform One Solutions Marketplace
- ABMS IDIQ – Track 6 (Data)
- JAIC DRAID BOA
- ACADIA OT (AFRL)
- High Ground IDIQ (SAF/CDM)

## Relationships That Last

## The SBIR Phase III Advantage

MDaaS and Arcturus accelerate modern software delivery to maximize lethality through a rapid, low-risk, and cost-efficient acquisition pathway. Proven with 200,000+ DAF users and IL2-IL5 accreditation, our SBIR Phase III solutions field secure software at mission speed—delivering MVPs in as little as 41 days. Move from contract to capability without delay.

# Fueling Dominance And Resilience For Next-Gen Warfare

Over the past decade, we have provided a firm foundation for our customers to quickly adapt to changing missions, design, experiment and launch new solutions.

- Reorienting for outcomes: A complete reinvention of how technology serves the core mission of our clients
- Connecting the dots: Integrating cutting-edge digital services, full-stack development, user-centric design, and advanced cloud and platform solutions, we are redefining the landscape of technological infrastructure
- Disconnected, Mobile, & Web: Building smart applications that are secure and functional in various environments contributes to cyber dominance by ensuring operational continuity and security
- Cloud & Platform: Focusing on infrastructure to drive cyber operations and build robust cyber defense capabilities
- Information Operations (IO): Integrating information related capabilities to influence and disrupt the decision-making of adversaries and potential adversaries
- Operational Enablement (OE): Utilizing advanced tools, technologies, and methodologies that support cyber operations, exploits vulnerabilities, and achieves strategic objectives

## Our Commitment

We take care of our people. Our people take care of mission. Our missions drive the change needed to create a more secure, resilient world.

## The Clarity Way

We are change makers. We solve the hard problems and move the mission forward.
